

A woman with long dark hair, wearing a bright yellow robe, is sitting cross-legged on a white fur rug. She is playing a set of five white singing bowls arranged on a small woven mat. The room is styled in a bohemian aesthetic, featuring a white staircase with a white railing in the background, two large dried pampas grass arrangements in glass vases, a patterned armchair, and a yellow cushion. The overall lighting is soft and warm.

# Smudging

is a ritual of cleansing while burning herbs or resin, guiding the smoke around the person or space connected to prayer or intention.

Some of my favorites are palo santo, copal or sage.

Our body holds frequency, energy field. As we interact with people, visit places many times we pick up on the energy of others. Good example is that feeling when you feel down and you are next to someone who is cheerful and happy, you are able to shift your state of mind. This can have positive impact, or bring shift of heaviness or stagnancy.

Ritual of smudging is moving and cleansing our energy field. It is possible to do the same with our home or items we wish to cleanse.

I consider a very important part of the smudging an intention. What do we wish to achieve when doing so. While performing ritual I am saying in my mind's eye or out loud intentions to give energy shift direction while guiding smoke around the person.

It is a very quick procedure, per person takes about 60 seconds and all you have to do is stand with arms by your body, palms facing forward.

VIBRANSÈ IS AN  
ILLUMINATION OF  
WHAT IS. IT'S A  
CELEBRATION OF  
LIFE'S EBBS &  
FLOWS.
